Assistant Professor of Epidemiology

The Department of Epidemiology is recruiting a tenure or non-tenure track faculty member at the Assistant Professor level. The non-tenure track line will be primarily expected to teach courses that support our undergraduate and graduate public health programs and serve as faculty advisor in the Bachelor of Public Health Program. The tenure-track line will also teach but will be expected to have a research portfolio, with the expectation to provide 50% funding support within the first three years of hire. The Department of Epidemiology is situated jointly within the College of Public Health and Health Professions and the College of Medicine, demonstrating a model of multidisciplinary research and focus. Our current faculty are leaders in psychiatric epidemiology, aging, infectious disease, environmental, genetic and chronic disease epidemiology. In addition to our PhD program we have a M.S. in epidemiology and a concentration in the MPH program. The department also has a vibrant research portfolio, with over $8 million in external funding.

Qualifications

- Doctoral degree in a public health, epidemiology or related field required
- Demonstrated excellence in teaching and mentoring
- Interest and ability to work with multidisciplinary research teams

To Apply

Submit cover letter, CV, and contact information of three references

The University of Florida is located in Gainesville, FL, which has been ranked the Best Place to Live in the US by Sperling and Sander’s Cities Ranked & Rated. The College of Public Health and Health Professions and the College of Medicine are in the University’s Health Science Center, which also includes the Colleges of Pharmacy, Nursing, Dentistry, and Veterinary Health. The Health Science Center also partners with the immediately adjacent Shands Healthcare, and Malcom Randall VA Medical Center, and the UF Heath Science Center Regional campus located in Jacksonville, FL. Additional major institutes and centers located at the University of Florida include the Emerging Pathogens Institute, the Institute of Child Health Policy, the UF Shands Cancer Center, the UF Genetics Institute, the Clinical and Translational Science Institute and the McKnight Brain Institute, all of which provide state-of-the-art environments and access to large data sets for faculty collaboration.

The University of Florida is an equal opportunity institution dedicated to building a broadly diverse and inclusive faculty and staff. Hiring is contingent upon eligibility to work in the U.S. Searches are conducted in accordance with Florida’s Sunshine Law.
